PROFESSIONAL SUMMARY

A B.com graduate in computer application with hands-on experience in Advanced Excel, SQL, Power BI, and Python for data analysis. Proven ability to build end-to-end data pipelines, design interactive dashboards, and extract actionable insights from complex datasets. Seeking a Data Analyst role to leverage analytical skills and drive business intelligence initiatives.

Projects

Online Sales Perfomance | Exce project — Jun 2025 – Jul 2025

- Developed an **Excel-based sales performance dashboard** to analyze online sales data across products, regions, and time periods.
- Cleaned and organized raw data using **Excel functions (IF, VLOOKUP, TEXT, REMOVE DUPLICATES, etc.)**.
- Used **Pivot Tables and Pivot Charts** to summarize sales, profit, and order trends.
- Created interactive dashboard with **slicers, filters, and charts** for easy data exploration.
- Identified key insights such as top-selling products, high-revenue regions, and monthly sales trends.Improved decision-making by presenting data in a clear and visual format.

VideoGame Player Perfomance |*SQL PROJECT* — *July 2025 – Aug 2025*

- Designed and developed a SQL-based database to analyze player performance & Wrote complex SQL queries using JOINs, GROUP BY, subqueries, and window functions to extract meaningful insights.
- Performed data cleaning and transformation to ensure accurate analysis of sports performance data.
- Generated performance reports to identify top-performing players and trends over time & Improved query efficiency by optimizing database structure and indexing.

Super Store Sales Analysis Dashboard | *Power BI Project* — Aug 2025 - Sep 2025

- Developed an interactive **Power BI dashboard** to analyze Super Store sales performance across regions, categories, and customer segments.
- Cleaned and transformed raw sales data using **Power Query Editor** to ensure data accuracy and consistency.
- Created key visualizations such as **Sales, Profit, Quantity, and Discount trends** using charts, slicers, and filters.
- Built **KPIs and DAX measures** to track performance metrics like total sales, profit margin, and year-over-year growth.
- Identified business insights such as top-performing regions, most profitable categories, and seasonal sales trends. Enabled data-driven decision-making through a user-friendly and interactive dashboard.

Training

Data Analytics Training – IT Vedant Institute

- Training in Data Analytics covering **SQL, Excel, Power BI (and Python if included)** Gained hands-on experience in **data cleaning, data visualization, and dashboard creation**.Worked on mini projects like **sales analysis and performance dashboards** & Developed practical Completed skills in generating insights from real-world datasets

Technical Skills

SQL & Databases: SQL Server, My SQL, Joins, Subqueries, Indexing, Data Warehouse
Visualization: Power BI (DAX, Data Modeling, Interactive Dashboards), KPI Reporting, Trend Analysis
Data Analysis: Advanced Excel, Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Data Cleaning, Tableaue, Power BI
Programming: Python, SQL, C++, Machine Learning
Soft Skills: Problem Solving, Stakeholder Reporting, Critical Thinking, Attention to Detail, Team Work, Analytical Thinking
Core Skills: Data Cleaning, Data Visualization, Business Intelligence, Dashboard Development

Education & Certifications

Osmania University — Hyderabad , Telangana

***Bachelor of Commerce (Computer Applications) – CGPA: 8.0* | MNR degree college** — 2023 - 2026

Data Analysis with AI – IT Vedant Institute — Hyderabad , Telangana
Completed training covering data analysis fundamentals, AI-based tools, and practical projects using Excel / SQL / visualization tools.
