

RANJANA RAWAT

Data Analyst | MIS Executive | Power BI & SQL Specialist
Greater Noida West, India • +91-9760422101 • ranjanarawat101@gmail.com • Open to Remote

PROFESSIONAL SUMMARY

Results-oriented Data Analyst and MIS professional with 2+ years of experience in data reporting, dashboard development, and operational analytics. Proficient in Power BI, SQL, and Advanced Excel — skilled at converting raw data into clear, actionable insights. Experienced in building automated MIS reports, KPI dashboards, and data visualizations that support business decision-making. Seeking a Data Analyst or MIS Executive role in Noida or a remote-friendly organization.

TECHNICAL SKILLS

Reporting & BI	Power BI (Dashboards, DAX, Power Query, KPIs, Drill-through, Slicers), Tableau (Basic)
Databases & SQL	SQL — SELECT, JOINS, GROUP BY, HAVING, Subqueries, CASE Statements
Excel / Sheets	Pivot Tables, VLOOKUP / XLOOKUP, Data Cleaning, MIS Reporting, Conditional Formatting
Programming	Python – Pandas (Beginner), Google Sheets, MS Office Suite, JIRA
Analytics	Data Cleaning, EDA, Trend Analysis, KPI Monitoring, Attrition Analysis, Sales Analytics

WORK EXPERIENCE

NOC Engineer (Data & Reporting) | Applied Solar Technology, Delhi 2020 – 2023

- ▶ Collected, validated, and analyzed solar power and battery performance data to monitor operational efficiency and flag anomalies.
- ▶ Prepared daily, weekly, and monthly MIS reports in Excel with KPI summaries for senior management review.
- ▶ Maintained and queried SQL databases for data validation, reconciliation, and performance tracking.
- ▶ Collaborated with cross-functional teams to identify data discrepancies, reducing reporting errors and improving data accuracy.
- ▶ Tracked operational trends and created structured Excel dashboards for real-time performance monitoring.

PROJECTS

Sales Analysis Dashboard | SQL · Power BI · DAX

- ▶ Analyzed 50,000+ sales records using SQL to compute revenue, profit margins, and YoY growth KPIs using JOIN, GROUP BY, and CASE statements.
- ▶ Built an interactive Power BI dashboard with slicers, DAX measures, and drill-through reports for region-wise and product-level performance tracking.
- ▶ Identified top-performing regions and high-value customer segments, providing actionable insights to guide sales strategy.
- ▶ Automated report refresh cycles, reducing manual reporting effort significantly.

HR Analytics & Attrition Dashboard | SQL · Power BI · Excel

- ▶ Analyzed employee dataset to compute attrition rate, headcount trends, and workforce KPIs using SQL aggregations and filtering.
- ▶ Performed end-to-end data cleaning and summary reporting in Excel to prepare structured inputs for dashboard development.

- ▶ Built an interactive Power BI dashboard to monitor employee turnover, tenure distribution, and department-wise attrition insights.
- ▶ Identified key drivers of employee attrition, enabling data-backed HR intervention recommendations.

EDUCATION

B.Tech – Electrical Engineering | Uttarakhand Technical
University (UTU), Dehradun

2017
