Data Analyst

+91 9846677675 Kochi, Kerala porayilnived345@gmail.com [LinkedIn](#) [GitHub](#)

SUMMARY

Passionate and highly motivated Data Analyst Fresher with a strong analytical mindset and hands on experience in data manipulation, visualization, reporting, and business intelligence. Proficient in SQL, Python, Power BI, Excel, and statistical analysis techniques, with the ability to collect, clean, analyze, and interpret complex datasets to uncover actionable insights. Skilled in creating interactive dashboards, KPI tracking, trend analysis, data modeling, and performance reporting to support data driven decision making.

Possesses a solid understanding of data analytics methodologies, predictive analysis, and problem-solving techniques, combined with strong attention to detail and a commitment to data accuracy. Adept at identifying business opportunities, optimizing processes, and translating technical findings into clear, stakeholder friendly recommendations. A quick learner with excellent communication and collaboration skills, eager to leverage technical expertise, analytical thinking, and business acumen to deliver measurable value and contribute to organizational growth in a dynamic and innovative environment.

TECHNICAL SKILLS

- **Programming & Query Languages:** SQL (MySQL, PostgreSQL), Python (Pandas, NumPy, Matplotlib, Seaborn), Basic R Programming
- **Data Analysis & Visualization:** Microsoft Power BI, Tableau, Microsoft Excel (Advanced), Google Sheets, Data Visualization & Dashboard Development
- **Database Management:** SQL Database Management, Data Extraction, Transformation & Loading (ETL), Data Cleaning and Data Validation
- **Analytics & Statistics:** Statistical Analysis, Descriptive & Predictive Analytics, Data Modeling, Hypothesis Testing, Trend Analysis, KPI Monitoring & Performance Analysis
- **Tools & Technologies:** Jupyter Notebook, Microsoft Office Suite, Git & GitHub, Power Query, DAX (Power BI)
- **Business Intelligence:** Business Intelligence Reporting, Interactive Dashboard Creation, Report Automation, Data driven Decision Making
- **Data Management:** Data Collection & Preparation, Data Wrangling, Data Mining, Data Quality Assessment, Data Interpretation

EXPERIENCE

Data Analyst

Luminar Technolab | Kochi, Kerala | Jun 2024 – Apr 2025

- Conducted exploratory data analysis (EDA) on 20+ real-world datasets using Python and SQL
- Developed machine learning models for predictive analytics, achieving an average accuracy metrics of 70 % and above
- Utilized SQL to extract and manipulate data , optimizing queries for faster data retrieval by 40 %
- Created interactive dashboards in Power BI to visualize key insights

EDUCATION

BSc in Statistics – Kannur University 2021-2024

Coursework: Statistical Inference and Hypothesis testing, Regression Analysis, Time Series Analysis, Sampling Theory

PROJECTS

- **HR Attrition Root Cause Analysis Dashboard:** Performed root cause analysis on a 1,470 employee dataset using SQL for data aggregation and Excel for advanced segmentation to identify primary drivers of a 16.1% attrition rate.
- Quantified and diagnosed key retention risks, discovering that employees working OverTime (30.6% attrition rate) and those new to their role (29.9% rate) were the most vulnerable groups.
- Developed a comprehensive, diagnostic Power BI dashboard featuring 6 key charts (including a matrix and grouped columns), 4 slicers, and 6 attrition-focused DAX KPIs (e.g. Average Tenure of Leavers).
- Translated complex findings into actionable business solutions, presenting recommendations focused on workload management, onboarding reform, and manager training to address the identified root causes
- **Hospital Waiting List Analysis(Power BI Dashboard Project):** Built an interactive Power BI dashboard to analyze healthcare waitlist data (2018–2021) across Inpatients, Outpatients, and Day Cases.
- Designed visual breakdowns by specialty, patient type, and age group, enabling detailed analysis of wait times and capacity gaps.
- Applied DAX to calculate KPIs like average vs. median wait times, helping to account for outliers and spot high-delay categories.
- Delivered insights such as a 72% outpatient majority and growth from 640K to 709K patients in one year, supporting targeted staffing and scheduling recommendations
- **Predicting Hazardous Near-Earth Objects (Asteroid Impact Prediction – Machine Learning):** Conducted exploratory data analysis (EDA) to uncover patterns in object size, distance, and velocity using Matplotlib and Seaborn for detailed visualizations.
- Analyzed feature distributions, correlations, and relationships to identify factors influencing an object's hazardous potential.
- Applied data preprocessing and feature engineering to enhance the dataset's quality and improve model performance.
- Built a Random Forest model to classify hazardous Near-Earth Objects and integrated it into an interactive Streamlit web app for real-time prediction.

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Sep 2024
- Tata Group – Data Visualisation: Empowering Business with Effective Insights[Forage] – Mar 2025
- Deloitte Australia – Data Analytics Job Simulation[Forage] Jun 2025
