

SAILAKSHMI SIRANGI

Java Backend Developer | Spring Boot | REST APIs | MySQL | JWT

+91 9390172792 | ssailaxmi379@gmail.com | linkedin.com/in/sailakshmi-sirangi | github.com/sailaxmi21

SUMMARY

Java Backend Developer with hands-on experience building Spring Boot REST APIs, JWT authentication systems, and backend services using MySQL and Hibernate. Built multiple production-style projects including a real-time chat system, e-commerce backend, and webhook-based automation service. Strong understanding of API design, database optimization, and backend architecture. Real project experience with internship exposure.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Hibernate ORM, REST APIs, JWT, JDBC, Spring MVC

Database: MySQL, SQL, Schema Design, Query Optimization

Frontend (Basic): React.js, HTML5, CSS3, JavaScript

Tools: Git, GitHub, Postman, Maven, IntelliJ IDEA

EXPERIENCE

- **Java Backend Developer Intern — ExcelR Services, Hyderabad** Jan 2025 – Jul 2025
 - Built and maintained Spring Boot REST APIs for backend workflows including JWT authentication, data processing, and service integration.
 - Designed MySQL schema and optimized queries, improving API performance by ~20% across key backend workflows.
 - Implemented unit and integration testing for backend services using Postman and JUnit; debugged and resolved production issues.
 - Worked with Git-based workflow — branches, pull requests, and code reviews — in a collaborative team environment.

PROJECTS

- **Real-Time Chat Application** github.com/sailaxmi21
Java, Spring Boot, JWT, MySQL, REST APIs, Hibernate ORM
 - Built real-time messaging backend using Spring Boot REST APIs and layered architecture (controller → service → DB).
 - Implemented JWT authentication for secure user sessions and role-based API access.
 - Designed scalable MySQL schema for message storage and retrieval; reduced DB latency by ~20% via query optimization.
 - Streamlined Git branching and integration testing; ensured reliable backend performance across core chat workflows.
 - Developed Spring Boot REST API endpoints following clean backend architecture principles — controller, service, and repository layers for scalable message handling.
 - Configured Hibernate ORM for efficient MySQL database operations; applied JWT token validation for every secured API request ensuring backend security standards.
- **E-Commerce Backend** github.com/sailaxmi21/ecommerce-backend-springboot
Java, Spring Boot, Hibernate ORM, MySQL, REST APIs
 - Built layered backend architecture (controller → service → repository → DB) for catalog, cart, and order management.
 - Structured RDBMS schema and authored SQL queries and stored procedures for 10+ core business flows.
 - Configured Maven builds, executed unit testing and code reviews, and documented all modules for delivery quality.
 - Implemented end-to-end order lifecycle — cart to checkout to order processing — with REST API integrations and MySQL stored procedures for business logic.
 - Applied Spring Boot REST API design principles for catalog, cart, and order services; optimized MySQL query performance reducing backend response time by ~20%.
- **WhatsApp Chatbot Backend** github.com/sailaxmi21/whatsapp-chatbot-backend
Java, Spring Boot, REST APIs, Webhook Integration, MySQL
 - Implemented webhook-based event processing system — architected flow from incoming webhook to Spring Boot handler to third-party API response.
 - Applied robust exception handling and logging for production stability; validated 10+ endpoints using Postman.
 - Authored reusable, well-documented Java components aligned with coding standards and security best practices.
 - Designed Spring Boot REST API endpoints for webhook event intake, message parsing, and automated third-party service response — end-to-end backend flow.
 - Integrated MySQL database for event logging and message persistence; applied structured exception handling and Postman-based API validation throughout.

EDUCATION & CERTIFICATIONS

B.Tech — Computer Science | Anurag Engineering College, Hyderabad

2021 – 2025

Certifications: Full Stack Java Developer — ExcelR Services | Oracle Database Certification — Oracle
