OBJECTIVE

Detail-oriented and organized Computer Science student seeking a Back Office Executive role where I can apply my strong computer operation, data entry, and documentation skills. Experienced in Excel, record management, and report preparation, with a keen eye for accuracy.

CORE SKILLS

- Computer Operation – proficient in MS Office (Word, Excel), Google Workspace
- Data Entry & Record Management – accurate data entry, maintaining and updating records
- Report & Document Preparation – drafting reports, presentations, and structured documents
- Email & Communication Management – drafting professional emails, internal communication
- Scheduling & Coordination – calendar management, meeting coordination
- Back Office Support – non-voice processing, data processing, document filing

RELEVANT EXPERIENCE

Bench Sale Recruiter | JP IT Staffing Company (Freelance)

- Sourced and identified qualified IT candidates through networking and recruitment databases
- Managed client communications and provided candidate information to match requirements
- Coordinated interviews and maintained organized records of candidate profiles and interactions

Data & Documentation Work | Academic & Self-Initiated Projects

- Maintained and organized structured data records across multiple Excel workbooks with sorting and filtering
- Prepared written reports and documentation summarizing data findings for stakeholders
- Drafted and formatted professional documents (reports, summaries, data tables) in MS Word and Excel

TECHNICAL SKILLS

- MS Excel – Data entry, Arithmetic operations, Sorting, Filtering
- MS Word – Document formatting, templates, professional report writing
- Google Sheets & Docs – Formulas, collaboration, file sharing
- Email Management – Drafting, organizing, and responding professionally
- Python & SQL – Basic scripting and data querying
- Git & GitHub – Version control basics
