

RAJESH S

AWS Cloud Engineer | DevOps Engineer | Aeronautical Engineering Graduate

Yercaud, Salem, Tamil Nadu | +91-9597494870 | davidrajesh00@gmail.com | github.com/Rajeshawscloud

PROFESSIONAL SUMMARY

Aeronautical Engineering graduate with AWS Certified Cloud Practitioner (CLF-C02) credential. Hands-on experience architecting multi-tier AWS solutions, implementing CI/CD pipelines, and deploying containerized workloads on Amazon EKS. Skilled in Infrastructure as Code using Terraform, automated deployments via AWS CodePipeline, and building serverless applications with Lambda, API Gateway, and DynamoDB. Bridges aeronautical engineering domain expertise with modern cloud-native DevOps practices to deliver scalable, secure, and cost-optimized infrastructure.

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) — Amazon Web Services March 2026

- Core domains: Cloud Concepts, Security & Compliance, Technology, Billing & Pricing
- Services: EC2, S3, RDS, Lambda, IAM, VPC, CloudWatch, CloudTrail, SNS, SQS, CloudFront, Route 53

TECHNICAL SKILLS

AWS Services: EC2, S3, Lambda, IAM, VPC, RDS, CloudFront, Route 53, CloudWatch, CloudTrail, SNS, SQS, EKS, ECR, CodePipeline, CodeBuild, CodeDeploy, API Gateway, DynamoDB, ACM

Infrastructure as Code: Terraform (modules, remote state with S3+DynamoDB, workspaces, CI/CD integration)

Containers & Orchestration: Docker, Kubernetes (K8s), Amazon EKS — Deployments, Services, HPA, Cluster Autoscaler, RBAC, Ingress/ALB

CI/CD & DevOps: AWS CodePipeline, CodeBuild, CodeDeploy, GitHub Actions — automated build/test/deploy workflows

Cloud Architecture: 3-Tier Architecture, Serverless, Microservices, High Availability, Auto Scaling, Fault Tolerance, Multi-AZ

Security: IAM roles & policies, least-privilege access, MFA, encryption at rest & in transit, VPC network segmentation

Operating Systems: Linux (Ubuntu / Amazon Linux) — shell scripting, process management, networking

Drone & Autonomous Systems: Drone hardware/software, autonomous flight, precision agriculture, voice-controlled systems, IoT integration

AWS CLOUD PORTFOLIO — GITHUB PROJECTS

github.com/Rajeshawscloud

01. Kubernetes on Amazon EKS May 2026

- Provisioned and configured a production Amazon EKS cluster using eksctl and Terraform
- Deployed containerized microservices with Kubernetes Deployments, Services, ConfigMaps, and Secrets
- Configured Horizontal Pod Autoscaler (HPA) and Cluster Autoscaler for dynamic workload scaling
- Implemented Ingress Controller with ALB for traffic routing and Kubernetes RBAC for access control

02. Terraform AWS 3-Tier Infrastructure (IaC) May 2026

- Re-architected full 3-tier AWS stack as Infrastructure as Code using modular Terraform design
- Managed remote state in S3 with DynamoDB state locking for safe team collaboration
- Parameterized all environments (dev/staging/prod) using Terraform workspaces and .tfvars files
- Integrated Terraform plan/apply into CI/CD pipeline for automated, auditable infrastructure changes

03. AWS CI/CD Pipeline April 2026

- Architected end-to-end CI/CD pipeline using AWS CodePipeline, CodeBuild, and CodeDeploy
- Integrated GitHub source stage with automated build, unit-test, and deployment stages across environments
- Configured buildspec.yml for Docker image builds and push to Amazon ECR
- Achieved zero-downtime deployments using blue/green deployment strategy on EC2 and ECS

04. Cloud Resume Challenge (Serverless) April 2026

- Built fully serverless resume website hosted on S3 with CloudFront CDN and custom domain via Route 53
- Implemented visitor counter using AWS Lambda (Python) + DynamoDB with API Gateway REST endpoint
- Automated infrastructure provisioning with Terraform and CI/CD deployment via GitHub Actions
- Applied HTTPS/TLS via ACM certificate; achieved sub-50ms global load times through CloudFront caching

05. AWS 3-Tier Web Architecture March 2026

- Designed and deployed a production-grade 3-tier architecture (Presentation, Application, Data layers) on AWS
- Provisioned EC2 instances with Auto Scaling groups across multiple Availability Zones for high availability
- Configured Application Load Balancer, private subnets, security groups, and RDS MySQL for the database tier
- Implemented IAM least-privilege roles and VPC network segmentation following AWS security best practices

EDUCATION

B.E. in Aeronautical Engineering — Paavai Engineering College, Namakkal Aug 2019 – May 2023

CGPA: 7.23 / 10 |

- Published research at ICATCNA International Conference, Kumbakonam

ACADEMIC PROJECTS

Voice-Activated Autonomous Spraying Drone (Main Project) | 2022 – 2023

- Designed a first-of-its-kind autonomous agricultural drone operated entirely by voice commands via custom software
- Integrated drone hardware, flight control software, and precision spraying mechanism to enhance farming efficiency
- Research published at ICATCNA International Conference, Kumbakonam

Design & Fabrication of Mini Jet Engine (Mini Project) | 2021 – 2022

- Researched jet propulsion theory; designed, fabricated, and successfully ran a compact mini jet engine from scratch
- Research published at ICATS International Conference, Namakkal

INTERNSHIP

Drone Pilot Training | Unitos Aero Drone Solution, Salem Jan 2023 – Apr 2023

- Completed core and advanced drone pilot training covering theory, hardware assembly, and software configuration
- Performed supervised drone flight operations in controlled environments, developing operational flight proficiency

KEY COMPETENCIES

Cloud Architecture Design • Infrastructure as Code (IaC) • CI/CD Pipeline Engineering • Container Orchestration • Problem-Solving & Root Cause Analysis • Technical Documentation • Fast Learner & Self-Starter • Team Collaboration

LANGUAGES

English — Professional Working Proficiency | Tamil — Native / Bilingual Proficiency
