PROFESSIONAL SUMMARY

An innovative Computer Science and Engineering graduate specializing in Artificial Intelligence, Machine Learning and Data Analytics. Proven expertise across the entire data lifecycle, from orchestrating robust ETL processes and structured SQL querying to executing advanced Exploratory Data Analysis (EDA) and deploying predictive models. Adept at engineering scalable business intelligence architectures, writing complex DAX measures, and designing interactive Power BI dashboards. Combines strong analytical problem-solving skills with a collaborative, Agile-minded approach to translate complex datasets into high-impact, secure business solutions.

TECHNICAL SKILLS

- **Data Visualization & BI:** Microsoft Power BI (Advanced Dashboarding, Reporting, & Performance Optimization), Power Query, Tableau, Microsoft Excel
- **Databases & ETL:** SQL (Query Optimization, Relational Databases), ETL Frameworks, Data Integration.
- **Machine Learning & Analytics:** Python (Pandas, NumPy, Scikit-learn), Exploratory Data Analysis (EDA), Predictive Modeling, Model Evaluation (MAE, R²)
- **Generative AI & NLP:** Agentic AI Concepts, LangChain, LlamaIndex, Retrieval-Augmented Generation, Large Language Models, Natural Language Processing
- **Methodologies & Cloud:** Agile Methodologies, Row Level Security, Knowledge of AWS Services
- **Core Languages:** Python, C, C++

EXPERIENCE

- Power BI Data Visualization & AI Intern
S R Innovative Technologies, Bengaluru | March 2026 – May 2026
 - Built a predictive model and Streamlit app for an AI Crop Yield Prediction project using Random Forest.
 - Developed a house sale price prediction model using Scikit-learn, optimizing performance via MAE and R².
 - Conducted EDA on sales and student datasets, creating interactive dashboards using Power BI and Tableau.

PROJECTS

- AI-Powered Crop Yield Prediction & Optimization Platform (Python, Streamlit, Scikit-learn)
 - Engineered an ML framework to predict crop outputs based on environmental parameters.
 - Designed a Streamlit UI to serve the model locally, facilitating dynamic data ingestion and output display.
- Pet Huddle – Full-Stack Web Application (MERN Stack, MongoDB)
 - Developed an e-commerce platform featuring seamless product browsing, user selection, and checkout.
- Text-to-Speech Converter (Python, NLP Basics)
 - Created a Python application converting raw textual data inputs into distinct, natural audio waveforms.

EDUCATION

- B.E in Computer Science and Engineering (AI&ML) | Don Bosco Institute of Technology, Bengaluru | CGPA: 9.25 | 05/2026
- Pre-University Course (PUC) | St Francis Desales PU College, Kolar | Percentage: 86% | 04/2022
- SSLC | Sri Datta Sai High School, Kolar | Percentage: 95% | 07/2020

CERTIFICATIONS & MISCELLANEOUS

- Certifications: NPTEL: Developing Software Skills (2023) | NPTEL: Enhancing Soft Skills (2024)
- Languages: English, Kannada, Hindi, Telugu, Tamil
