PROJECTS

Bookie Store, The users to buy and sell second hand books in cheap and best rates with guaranteed quality. Users can login and view all the books required and on the other end, users can add books if they wanted to sell the particular book. Offerus, "Offerus" is an application which is developed focusing the orphanages and visually challenged citizens. In this application, the contributors can contribute their dress food and other uses or unused materials for the orphans. The acceptor can directly contact the contributor via Offerus and collect their needs. Smart Dustbin, Our project is based on the segregation of wastes. There are two types of dustbins kept on roads which are, Bio-degradable and non-biodegradable wastes. Using sensors and Image processing techniques, we have refined the SMART DUSTBIN whereas here, the sensors can deduct the metallic items plastics, paper, vegetable wastes and so on.

PUBLICATIONS

Segregation of waste using image processing technique for a smart dustbin in waste, ICRAET, 2019, Best paper in International conference(ICRAET) on Segregation of waste using image processing technique for a smart dustbin in waste
